

Health and Safety Policy

AEM Ltd Policy Statement

AEM Ltd provides accessory maintenance services to the aviation industry, which includes machining and plating, valves and pumps, flying controls and landing gear.

Our business is committed to maintaining a safe and healthy environment for our personnel. In particular, we are committed to:

- Complying with all relevant health and safety legislation and regulations.
- Conducting suitable and sufficient assessments to provide all the information needed for a safe and healthy work place.
- Reducing health and safety risks on site so that we prevent the likelihood of injury or ill-health.
- Continually improve our training for personnel in all health and safety aspects.

Objectives and programmes to address our significant risks have been set and our attention is currently focused on:

- Ensuring all hazards are identified and managed.
- Ensuring good chemical management and safe practices.

This policy is communicated to all employees, customers and suppliers and is freely available to the public.

The commitments in this policy are managed and delivered through our Health and Safety Management System in line with OHSAS 18001. We will review our compliance with these commitments, and our progress against the objectives and programmes, at the annual Health and Safety Management Review meeting.

Alan Harding
